Inquiry ELAGSE3W7 ELAGSE3W8	I didn't use the website links or books provided. My notes are from my brain.	I used the links on the website or books to research information and took minimal notes.	I used the links on the website or books to research information and took some notes.	I used the links on the website or books to research information and took a lot of notes.
Inquiry S3L1	Information in my organizer is not specific to the region where my animal lives.	I have 2 or 3 things in my organizer about the specific region where my animal lives.	I have 5 to 6 things in my organizer about the specific region where my animal lives.	I have 7 or more things in my organizer about the specific region where my animal lives.
Critical Thinking S3L1	I did not determine what needs to be in my animal's habitat.	I determined 1 or 2 things that my animal would need in its habitat.	I determined 3 or 4 things that my animal would need in its habitat.	I determined 5 or more things that my animal would need in its habitat.
Collaboration ELAGSE3SL1	I did not share my ideas with my group in a patient and kind voice. I did not listen respectfully to others and compromise when our ideas were different.	Sometimes I shared my ideas with my group or I had trouble using a patient and kind voice. Sometimes I listened respectfully to others or I had trouble compromising when our ideas were different.	I shared my ideas with my group and usually used a patient and kind voice. I usually listened respectfully to others and compromised when our ideas were different.	I shared my ideas with my group and always used a patient and kind voice. I always listened respectfully to others and compromised when our ideas were different.
Communication ELAGSE3W6	My group did not work together to create a SWAY or model that included text, pictures, and videos.	My group worked together on our SWAY or model, but was missing text, pictures, or videos to show others what our animal needed in its habitat.	My group worked together on our SWAY or model, but had minimal text, pictures, or videos to show others what our animal needed in its habitat.	My group worked together on our SWAY or model, and had a lot of text, pictures, or videos to show others what our animal needed in its habitat.
